

Rober Leon Guerrero Mendoza

Backend Developer

Tarija, Bolivia · [LinkedIn](#) · roberguerrermendoza@gmail.com · [Portfolio](#)

I am a software developer with 2 years of experience in software development, dedicated to delivering and building high-quality software solutions that follow the industry best practices that ensure efficiency and long-term sustainability. I have worked on backend development with .NET ecosystem, and additionally I have experience in frontend development using Angular.

PROFESSIONAL EXPERIENCE

Freelancer

Full Stack Developer - Freelancer

Remote

Tarija, Bolivia

January–April 2026

- Developed a full-stack web application for ticketing management.
- Designed the system architecture using UML diagrams, including ER, class and sequence diagrams.
- Built the backend with .NET 10 and ASP.NET Core Web API using Minimal API, crafting RESTful endpoints with a focus on maintainability and scalability.
- Designed and implemented a PostgreSQL database using code-first approach, applying normalization techniques.
- Secured the application by implementing RBAC (Role-Based Access Control) through ASP.NET Core Identity and JWT tokens, managing permissions across different user roles.
- Containerized the application using Docker and Docker Compose, establishing an isolated development environment.
- Built the frontend in Angular 21 using PrimeNG and Talwind for responsive design.
- Wrote comprehensive testing using xUnit for unit tests and TestContainers for integration tests.
- Managed source control and project tracking with Git and Azure DevOps.
- Build CI/CD azure pipelines in Azure DevOps for PR Validation and automated deployment to Azure Web Apps.

Skills

.NET 10, ASP.NET Core Web API, Minimal API, C#, Entity Framework Core, Angular, Docker, Docker Compose, xUnit, TestContainers, PostgreSQL, JWT, AzureDevOps, Azure Pipelines, Azure Web Apps.

Freelancer

Full Stack Developer - Freelancer

Remote

Tarija, Bolivia

August 2025–December 2025

- Developed a RESTful API for an inventory management system to handle product tracking, stock control, and warehouse operations.
- Designed the system architecture using UML diagrams, including use case, class and sequence diagrams.
- Developed the backend using .NET 9 and ASP.NET Core Web API, implementing RESTful endpoints following clean architecture principles and best practices for maintainability and scalability.
- Designed and implemented the database using PostgreSQL, applying normalization techniques
- Implemented RBAC (Role-Based Access Control) authentication using JWT tokens to secure API endpoints and manage user permissions across different roles.
- Containerized the application using Docker and Docker Compose, creating isolated development and deployment environments.

- Implemented comprehensive testing using xUnit for unit tests and TestContainers for unit and integration tests.
- Utilized Git and GitHub for version control, implementing branching strategies.

Skills

.NET 9, ASP.NET Core Web API, C#, Entity Framework Core, Docker, Docker Compose, xUnit, TestContainers, PostgreSQL, JWT Authentication, RBAC, API RESTful, Git & GitHub, UML.

Plan International Bolivia

Tarija, Bolivia

FullStack Developer - *Internship*

January 2024–June 2024

- Developed a web system for tracking and managing letters within the organization.
- Gathered and analyzed functional and non-functional requirements, transforming them into detailed use cases to guide system development.
- Employed SCRUM and Azure DevOps for project management, including Product Backlog creation and management, ensuring incremental deliveries and enhanced planning.
- Designed the system architecture using UML: created use case diagrams for functionality identification, class diagrams for static structure modeling, and sequence diagrams to illustrate key object interactions.
- Developed the backend with ASP.NET Core, implementing a clean architecture using the CQRS pattern to optimize performance by separating read and write operations, enhancing scalability.
- Designed the database using SQL Server, applying normalization techniques to create efficient and scalable database schemas.
- Built a responsive user interface with Angular 17, Tailwind CSS, and Angular Material.

Skills

.NET 8, ASP.NET Core Web API, C#, Entity Framework Core, CQRS, Angular 17, API RESTful, SQL Server 2022, Git, Azure DevOps, Scrum, UML.

Plan International Bolivia

Tarija, Bolivia

IT Support - *Internship*

April 2023–December 2023

- Implemented and managed a print server, increasing efficiency and resource control, which was later scaled to branches nationwide.
- Optimized print reports by developing a Python script with Pandas for data extraction and cleanup from the print server, displayed effectively in a Power BI dashboard.
- Created a scheduled MySQL event to delete temporary files, improving performance by 5%.
- Provided technical support for hardware, software, and networks, resolving issues for staff.
- Managed user accounts and permissions, ensuring secure and appropriate access.

Skills

Python 3.12, Networking, Windows Server 2019, Ubuntu Server 20.04, Active Directory, MySQL, Office 2016

Cybercorp

Tarija, Bolivia

FullStack Developer - *Internship*

Sep 2022–December 2022

- Developed a web system for managing product inventory.
- Collaborated closely with the logistics and warehouse departments, ensuring the system met business requirements by capturing and analyzing functional requirements.
- Actively participated in project cycle planning and management using SCRUM and Azure DevOps.
- Used UML diagrams, including use case and sequence diagrams, to clearly and effectively plan and design the system.

- Designed and modeled the database with PostgreSQL, applying the first three normalization principles to ensure scalability and data redundancy minimization.
- Developed the backend using Django with MVC architecture, providing logical and modular project structuring that allowed for agile development and integration of new functionalities.
- Contributed to UI development using Angular with Tailwind CSS, creating an intuitive and functional interface.
- Participated in code documentation and refactoring to improve code readability.

Skills

Python 3.10, Django 4.1, Angular 12, PostgreSQL, Git & GitHub, UML, API RESTful, Scrum, Azure DevOps

EDUCATION

UNIVERSIDAD PRIVADA DOMINGO SAVIO (UPDS)

Bachelor's Degree in Systems Engineering
Winner of an internal programming competition

Tarija, Bolivia

February 2019–Sep 2024

CENTRO BOLIVIANO AMERICANO (CBA)

Advanced Technical English

Tarija, Bolivia

February 2023–Present

UNIVERSIDAD CATÓLICA BOLIVIANA (UCB)

Master's Degree in Advanced Software Development

Tarija, Bolivia

February 2025–Present

TECHNICAL SKILLS

.NET, C#, ASP.NET Core, xUnit, Test Containers, Docker, Azure DevOps, Angular, SQL Server, Git & Github, Python3, API RESTful, Software Architecture, Design Patterns, UML, SCRUM, HTML, CSS

SOFT SKILLS

Problem-Solving Skills, Teamwork & Collaboration, Adaptability & Learning Agility, Critical Thinking, Attention to Detail and Communication Skills.

LANGUAGES

Spanish(native), English (B1)
